Re: North American and Global Certification of BASF Products

Dear Jeff,

BASF has fully complied with Ford Motor Company aftermarket refinish specification WSS- M2P-100-D, and has our full approval of all solvent borne and waterborne products listed in the required materials summary chart to be used for Ford dealership warranty repairs.

The refinish paint approvals follow a series of rigorous and comprehensive technical evaluations that ensure that a vehicle will be returned to pre-accident condition. It encompasses all vehicle brands that exist under the Ford Motor Company umbrella.

Please use this information as you require to reinforce your excellent standing with the Ford Motor Company and our engineering material specifications.

Thank You, and Best Regards,

A handwritten signature in black ink that reads "Gerry Bonanni".
